HUMOR AND HUMORISTS.

Men Who Could Be Funny While Suffering Bodily Patn. Even in the old times of chivalry and romance, the knightly days whose legends still stir our blood, the merry song, the priest's homily and the wise man's philosophy were, in turn, each just purchased a couple of pairs of 6's in given a welcome in court and camp, an uptown shop devoted exclusively to write. He might be inclined to repress a love of learning if he felt it. as a impulse that would throw doubt upon The box was about half full of gloves his entire devotion to those martial ac complishments which were then con sidered the nobler objects of ambition. Still the royal mind craved variety and sought the refreshment or balm suited to its changing moods. If the play of feeling was in the minor key, the troubadour was in request with his sad, sweet ministrations, breath-

perfect and as well made as those for ing thoughts of love, sobbing the woes of exile and prisons, chanting the triumphant eestasy of holy vows accomplished, or in stirring measures singing of battles and tourney. If the royal purpose ran high, or the royal fortunes were low, the priest and sage were called to the front; but in times of prosperity and festivity motley was the only wear. Human nature remains about the

same. Its needs and desires follow the old lines; so the jester still remains a prominent figure in our civilization, though he has changed his methods to new conditions. The element of humor is no longer an incident of newspaper and magazine contents, employed simply as ballast; it has become an indis-pensable feature. The jester's services are no longer confined to the high circles of rank and authority, for through improved methods of diffusion the enire populace has the benefit of them.

Humor has become a staple of the literary market. There are various degrees of value according to quality; but it is agreed that humor, of some kind, is no longer an occasional luxury, but an every-day necessity, and humorists have ceased to be beacon lights, glittering in lonely splend-rupon the heights; but booest argands, or tapers, or rushlights, as the case may be, carrying their cheer into the humblest corners of

relations between the workers in this field and their works. The humor field and their works. The humor of some men is a creation, of others an emanation; the product of one mind is simply mental, of another temperamental as well. One of the princes of pantonime, when torm by dyspepsia and driven elmost wild by insomnia, sought relief from a physician.

"Ah," said the learned doctor, "you "Ah," said the learned doctor, "you must have cheerful surroundings; go and see Grimaldi." "Alas," said the suffer, "I am Grimaldi." Tom Roed did some of his best work when tormented by bodily pain. Much of Mark Twain's success as a reader is due to a ludierous contrast between the superiative ugliness and solemnity of his personal appearance and the irresistible drollery of

The humor or wit of the late John G. Saxe, while it was a source of leeen en-joyment to others, shot no backward ray to cheer the heart of its author, and during his closing years he lived sadly and honelessly among the deepest shad-ows. He was the prey of settled raciancholy. The lest of his life had long left were Dead Sea apples. One strong contrast with this sunbre picture was that which showed the late R. P. Shillnote paper in the most and a clust and smoke in his sick-room

Whatever may be the reflex action of humor upon humorists, they are, as a less than at any previous time in the world's history, could we do without
